

Bridgewater Operational Notice

Our Bridgewater location sustained some damage during the storm Thursday, May 12. We are operating at much of our usual capacity with just slight adjustments, noted below. Our team is working diligently to keep business disruptions to a minimum. We thank you for your patience and cooperation. Our first priority is always the safety of our employees, customers and community. Our thoughts and prayers are with our producers, community members and businesses that have been affected.

Dry Fertilizer: We ask that customers call ahead to the office at 605-729-2518 for all dry fertilizer pickup. This will allow us time to coordinate with the Freeman location to get tons delivered and placed.

Crop protection products and custom application: All services are running as usual. Please contact us if you have sustained damage to your application equipment and are needing assistance getting your product down, our team is here to help.

We ask that you use caution when coming into the facility as we work through the cleanup process.

Please call the office or stop in if there's anything we can assist you with. The coffee is on and our team is ready to help you through this time.
